

Why Whole-Home Air Purification? **Honeywell**

- Makes HVAC Systems more efficient
- Air Treatment to neutralize odors
- The UV Light deactivates of airborne or surface contaminants like mold, bacteria and viruses

PROTECTING YOUR HAVEN

You want to feel good about your home. After all, it's your refuge. So how do you keep out uninvited guests that you can't see, but that you sure can smell?

So what's the solution?
You might be surprised to find out that it starts with a ray of light.

Ultraviolet Air Purifier with AirBRIGHT™ Odor Absorption

SAVE ENERGY, SAVE MONEY

Mold and mildew growing in your home's heating and cooling system bog down the equipment, making it work harder to maintain your desired temperature. And sometimes the problem can be so bad that you have to get your system professionally cleaned, which can be expensive. The Ultraviolet Air Purifier helps keep coils clean, which adds up to increased comfort and energy efficiency.
